Int. Jahr der Pflege 2020 – Save the date: Nightingale2020 Int. Conference – ExCeL London

Transforming the Impact of Nursing on Global Health and Care:
An agenda-setting international conference, 27 – 28 October 2020

Nightingale2020 is a unique conference. By reflecting on the legacy of the first modern nurse, Florence Nightingale, we're focussing on the role of nurses and midwives in health and care today and in the future. Delegates from all backgrounds will find something to inspire their work and outlook.

In the 4,000 seat auditorium we'll hear from exceptional international speakers; our scientific committee is creating an agenda of lively peer-led presentations in the academy and delegates can network and build relationships in the exhibition hall, where lunch will be provided.

The conference agenda is organised into four tracks which are current to today's nurses and midwives covering: **nursing impact, world health, professionalism and digital health.**
